

Energy savings with MasterJet Pro without recirculation

The header design of MasterJet Pro without recirculation leads to reduced flow volume without negative impact on quality or process stability. The reduction of approx. 7% results in savings of approx. 450,000 kWh per year.

Project: 4-rows headbox 1,200 m/min

Customer: Paper mill, Germany

Paper grade: Corrugating Medium, Testliner

Comparison of headbox flow (kWh/a)
